

# WHICH *BB* CREAM SHADE IS RIGHT FOR YOU?

Our Beauty Balm comes in three universal shades, this product is intended to be applied lightly to offer a sheer level of coverage therefore the shade of the BB will not be an exact match to the foundation shade you use.

The BB shades available cover the majority of our Mineral Foundation shades therefore we can recommend what shade to try based on the Lily Lolo foundation shade you use. Please note, this is just a guide and you may prefer a different shade to that suggested.

BB CREAM SHADE GUIDE

\* For these shades both BB Cream shades may be suitable, it depends on your personal preference and what effect you prefer from your makeup (i.e. if you like to warm up your complexion through bronzer etc.) however if you are unsure we would recommend the lightest shade of the two which should be more true to your Foundation shade.
